Elektroninis paštas

15. Pasirinkite **Use the same settings as my incoming mail server.**

16. Pasirinkite **Advanced** kortelę.

The screenshot shows the 'Advanced' tab of an Outlook mail client's configuration window. It is divided into three sections: 'Server Port Numbers', 'Server Timeouts', and 'Folders'.
- **Server Port Numbers:** Includes fields for 'Incoming server (IMAP):' with the value '143' and a 'Use Defaults' button, and 'Outgoing server (SMTP):' with the value '587'. Both sections have a dropdown menu for 'Use the following type of encrypted connection:' set to 'None'.
- **Server Timeouts:** Shows 'Short' and 'Long' settings, with 'Long' set to '1 minute'.
- **Folders:** Includes a 'Root folder path:' text input field.

- Jei naudojate POP3 protokolą **SMTP** prievado reikšmė - **587**, **POP3** - **110**. Kai kurie interneto tiekėjai blokuoja **587** prievadą, todėl Jums reikia kreiptis pas tokį tiekėją ir paklausti kokia turi būti **SMTP** reikšmė.
- Jei naudojate **IMAP** protokolą - nurodykite **143** prievadą.

[Nežinote ką naudoti IMAP ar POP3?](#)

17. Paspauskite **OK**.

18. Kol esate **E-mail Accounts** lange, paspauskite **Test Account Settings** mygtuką.
