# Elektroninis paštas

15. Pasirinkite **Use the same settings as my incoming mail server.**

16. Pasirinkite **Advanced** kortelę.

The screenshot shows the 'Advanced' tab of the 'Outgoing Server' settings in Outlook. The 'Server Port Numbers' section includes: 'Incoming server (IMAP):' with a text box containing '143' and a 'Use Defaults' button; 'Use the following type of encrypted connection:' with a dropdown menu set to 'None'; 'Outgoing server (SMTP):' with a text box containing '587'; and another 'Use the following type of encrypted connection:' dropdown menu set to 'None'. The 'Server Timeouts' section shows a slider between 'Short' and 'Long 1 minute'. The 'Folders' section has a 'Root folder path:' label and an empty text box.

- Jei naudojate POP3 protokolą **SMTP** prievado reikšmė - **587**, **POP3** - **110**. Kai kurie interneto tiekėjai blokuoja **587** prievadą, todėl Jums reikia kreiptis pas tokį tiekėją ir paklausti kokia turi būti **SMTP** reikšmė.
- Jei naudojate **IMAP** protokolą - nurodykite **143** prievadą.

[Nežinote ką naudoti IMAP ar POP3?](#)

17. Paspauskite **OK**.

18. Kol esate **E-mail Accounts** lange, paspauskite **Test Account Settings** mygtuką.
